

## OCLC White Paper on the Information Habits of College Students

Verbatim answers: "Based on your experiences, what two things should your campus library do to help you with your study assignments?"

- 1 #1. Have computers available. #2. Have helpful staff available.
- 2 (1) Put more classes on Blackboard (www.blackboard.com or the school's local site) (2) More classes should have reserves available online
- 3 (1) Make it easier to access articles by not keeping security so tight for specific courses, it's pointless and unfair! (2) Design & put up a huge poster board with instructions on how to find a book, article, journal, etc.... I couldn't find anything in their if my life depended on it!
- 4 \* better availability for library assistance \* more resources \* faster access to the databases
- 5 \* more bandwidth. \* faster computers.
- 6 \* Put request forms on the internet for ordering books, etc. from other libraries \* Update their collection
- 7 [University name] is set up very well to help us--it is basically teaching yourself how to use the resources that it difficult. Perhaps a tutorial should be held at some colleges to show students the resources available.
- 8 1 offer more websites and journals 2 create a bibliography format sheet
- 9 1 - Provide a brief description of the different contents/results of your search. 2 - Provide better information about how to get books from other libraries.
- 10 1 PROVIDE A LINK TO [db provider] 2 HAVE MORE ARTICLES AVAILABLE FROM THE INTERNET.
- 11 1) Get more electronic versions of printed texts, journals, resources etc. 2) Make more information accessible to the internet from a home computer (my university limits electronic resources to the campus network; my computer is off campus)
- 12 1) Provide access to literature searches based on field, e.g. [db provider] 2) Provide access to the listed resources, preferably in hard-copy formats.
- 13 1) Along with the e-journals/e-periodicals that are available, I would also like to see a collection of e-books included in the library's catalog.
- 14 1) Easier order to the books. Make them all on one floor. 2) Have more computers
- 15 1) Electronic journal - which they already have. 2) List of journal abbreviations (which is available at other library sites)
- 16 1) Know before-hand what I am working on (for example, the professor notifies the library staff about a paper that he/she has assigned to his/her class) and know where to get good information. 2) Have it available, and easy to find. I hate having to go on book hunts in secluded, sometimes dark corners of the library.
- 17 1) Make \*all\* journal/periodical/newspaper articles downloadable, and/or simplify the microfiche search & print-out process. 2) Provide abstracts not only of articles but also of books in all bibliographic databases, so as to make it easier for students/researchers to know beforehand how relevant the material will be.
- 18 1) Make [db provider] available to all students off campus. 2) Have round the clock technician support help for students.
- 19 1) offer more computers for use to access the Internet 2) offer more library computer lab hours
- 20 1) reserve more computers strictly for library research (and not for email, etc) 2) use a more expansive cross-reference method in library searches, i.e. I should be able to look up books on either Native Americans or American Indians in the same search
- 21 1) stop the system from crashing as often as it does 2) Have one database for all journals, not separated by subject, in which keywords, author etc. can be entered for a search

- 22 1) The campus should not charge us for print-outs. They charge between 5-15 cents per page that we print out. This majority deters me from using the campus library. I go to [University name]. I think it's absurd to pay this since we already pay a per-semester technology fee. What is that fee for if not for the upkeep and maintenance of computers and printers. 2) Classes should learn how to use e-journals better. I had to learn on my own and I'm still not completely sure of how to fully utilize them. They seem like a great wealth of information, but I'm not sure if I'm doing it right, cause sometimes I get a lot of info and sometimes [sic]
- 23 1) Bigger database 2) More categories in descriptive forms
- 24 1) offer more full articles online 2) Provide more help
- 25 1) Provide an up-to-date index to every bound academic periodical/journal on the SHELF. Our access to databases, e-journals, etc is the only way to know the content of the bound journals. 2) Get the misplaced/returned books in their correct places faster.
- 26 1) Provide info on how to use online library resources 2) Inform all students as to where the different sections of the library are.
- 27 1. Allow for full text downloads of electronic articles. 2. Cross referencing based on a keyword in a company lookup.
- 28 1. enable me to search my library's content 2. have links to all the academic search engines, journals and databases that the college subscribes to.
- 29 1. Expand their collection 2. Have more information available in full-text databases.
- 30 1. have more information stored electronically 2. have easy access to that information from both school and home
- 31 1. Help line 2. Bibliographies of resources
- 32 1. Inform about all types of media and information available. 2. When tracking pieces of work they don't have be more thorough in trying to find who might have it.
- 33 1. make full text articles available 2. provide links to other research sites
- 34 1. make it more user friendly 2. provide more accurate info with the search option
- 35 1. Make website more user-friendly 2. Provide more links to online academic sources
- 36 1. More specific search criteria, it is too general so you end up having to dig through tons of information when most of it is not useful. 2. more full-length articles and journals online
- 37 1. Not lose books. 2. Update the [database]
- 38 1. Receive Journal articles from another campus in a more timely matter 2. Make more journals accessible
- 39 1. a more efficient click-through rate for searching the [library online catalog] 2. one search engine for all library databases rather than making you choose which database you want to search
- 40 1. add more journals for sciences 2. update the library catalog more often
- 41 1. be more accommodating 2. be more friendly
- 42 1. Be more available 2. Design the library to be more open and inviting, I don't use it because I feel sectioned off from those that can help me
- 43 1. be more helpful with format information (i.e. [databases], etc) 2. help with finding difficult information from an academic standpoint (i.e. academic information on TV shows, internet, etc.)
- 44 1. Better organization of the physical location of books. 2. More people available to answer questions
- 45 1. Create a good website with helpful links. 2. Create a easy to use website
- 46 1. don't require a log-in name to use the catalog 2. require that some machines be used only for research, and others for email, etc.
- 47 1. Each class at school should have space on the electronic library to have reserved for course work and study tools & tips. 2. Update the computers. Some computers in my campus library are just too old to even bother using.
- 48 1. easy to navigate 2. plenty of information available
- 49 1. Give me well-categorized listings of databases the library subscribes to. 2. Suggest academic journals related to the subject matter.

- 50 1. Have a good search mechanism. 2. Offer a site with links to other websites that may have relevant information.
- 51 1. have more accurate info. 2. have more people on hand and ready to assist at any time.
- 52 1. Have more full text articles 2. Some research sites are difficult to get into to [sic]
- 53 1. Include more online journals and articles 2. Online librarian help
- 54 1. Know locations of diverse sources on certain subjects. 2. Know where to locate scholarly journal
- 55 1. lead me to resources in the library 2. provide me access to databases such as [db provider]
- 56 1. Longer hours 2. Ease of receiving books from other university libraries
- 57 1. Make articles and journals easier to find 2. Provide outlining and note taking techniques
- 58 1. make it easier to find stuff 2. help you out
- 59 1. Make it easier to get more specific about the topic I am searching for- narrow down the number of results so I get the books I want and get rid of topics irrelevant to what I am searching for. 2. Develop a better way to help students figure out what how to identify which subject headings to search under in order to find material most relevant to the desired topic.
- 60 1. make searching for articles more user friendly. 2. make searching for articles quicker
- 61 1. Make the website easier to navigate 2. Make online resources and periodicals available for checkout
- 62 1. make the website easier to use 2. full text items
- 63 1. more complete article databases 2. cheaper copies
- 64 1. More electronic access to old information, journals and periodicals. 2. More full-text options.
- 65 1. More full text journals online 2. More users at a time should be licensed through the library homepage for [databases, etc.]
- 66 1. offer a wider variety of Christian books 2. have books that are easier to locate and easier to check out
- 67 1. offer more computers with MS Office 2. have more tables for group work
- 68 1. provide a clearer, more user-friendly website 2. make more complete articles and reserve resources available online
- 69 1. Provide better maps of the library 2. Allow you to place holds online and then have a librarian retrieve the materials, which you could then pick up at your convenience
- 70 1. provide clear instructions on where to find a book 2. help locate a book that is not in the campus library
- 71 1. Provide help when needed using the web site. 2. Give a variety of other related web sites dealing with topic.
- 72 1. Provide more resources. 2. Provide knowledgeable librarians.
- 73 1. They should make their databases open to students who live off campus 2. Should have a detailed directions next to the computers on how to navigate through all the services available
- 74 1. Train the people that help in the library on how to use the links on their web page. I can't think of anything else, our web page has everything we need on it for all the different colleges that we house.
- 75 1. Web based Bibliographic and Footnote entries 2. Finding primary source material on current topics
- 76 1.) Provide an office to assist in rigorous research (CARS) 2.) Streamline information
- 77 1.) Buy more books. 2.) Make a better search engine.
- 78 1.) Make it easier to pull up full-text journal entries. I'm a senior at the [University]. I've been trying to pull up journal articles by a professor whom I wish to work with when I go to graduate school. Instead of being able to search and go straight to a specific article, you have to search for the journal, then the author, then the article, and MAYBE you'll get to the one you want.... It gets frustrating. I have author, title, call number, date, and journal name, and I STILL have to go through the hassle. It would be so much easier if I could just do one search and get the article up. 2.) List whether or not material put on reserve by professors is actually in.

- 79 1.Ask the person who I have to do the assignment for what he or she is looking for what info the want and. 2.Ask the student what he knows
- 80 1.Have a good list of Journal Articles/Periodicals 2.Have a place to type in a search question and the site list sources of information to help on my quest.
- 81 1.Have other close places to choose from in which we can look to find a book we need (ex: local library, bookstore, etc....) 2.waiting list & alternate related topics to look for
- 82 1.provide links to websites that offer professional journals and articles. 2.provide tips for searching
- 83 1.stay open later 2.more study space
- 84 1-offer more info on the website about how to do interlibrary loan 2-offer online interlibrary loan services
- 85 1-Offer short seminars on how to use the library's databases 2-Mention all of the resources available to students on the library homepage
- 86 A website that is updated more often. Understandable internal search engines.
- 87 Actually have one
- 88 Actually, I'd just really like their circulation desk to be open 24 hours, and they should have more full text stuff online.
- 89 Add a few more small 'study rooms.' nothing
- 90 Add more computers for web based research. There are not enough. The majority of the computers are for library-based tool access only.
- 91 advertise more around campus step by step walkthrough via the web.
- 92 Advertise the fact that they have one and have the name of said site to be easy to remember!
- 93 Allow a student to be able to search for information by the course. I.E. place all journals on ethics in a section for the Ethics course.
- 94 allow access to databases from home computers, more accurate responses from searches
- 95 Allow area wide search of libraries, including those outside consortium.
- 96 Allow remote access to catalog/periodicals/reserve information for students with internet access at home. Make information easier to find, possibly combining their databases.
- 97 Allow students to print certain (non-entertainment) information in the library without being charged. Also, it would be beneficial if different libraries on campus could send articles, books, etc, to the main library at students requests.
- 98 answer questions right away and know what they have in the system
- 99 As a campus library sees students accessing similar materials for the same thing, perhaps collate the materials together. Maybe collaboration with the professors would help.
- 100 ask a librarian
- 101 Ask instructors [to] include links or research databases for specific majors--including those which are more specialized. Subscribe to a broader range of research databases besides those for English and Science, etc.
- 102 be 24 hour - I have to work, and more often than not, the times I have available to go, the building is closed. I can't think of anything else.
- 103 Be able to help with where to find information
- 104 Be as easy to use as the Internet - I don't want to search through tons of useless information to find what I'm looking for. Lycos.com lets me narrow down my search results. Be available from home.
- 105 Be available for help if needed, provide a list of helpful websites
- 106 Be clearer More focused websites
- 107 Be easier to access from home. Have the links accessible from home.
- 108 Be easier to navigate and have access to other libraries
- 109 be easier to use
- 110 be easy to navigate through and be able to answer questions
- 111 be easy to use
- 112 Be easy to use and give useful information about where you can find the book(s).
- 113 Be easy to use and have a lot of info.

- 114 be easy to use have helpful people to point you in the right direction
- 115 be easy to use to search for journal articles, have more of the journals available electronically
- 116 be friendlier and have the books that I need
- 117 be helpful and be better arranged
- 118 be in one building on campus and have more areas where people can study in groups and don't have to be quiet
- 119 be more accurate with journal articles and have more options of copying on line at home
- 120 be more current and up to date bigger
- 121 be more friendly and be open longer hours
- 122 be more friendly set up better directories to locate items in the library
- 123 Be more interactive with the faculty, instead of having to go to the Library's front desk to find out what books you have to choose from. Also a way to check if that book was already out without having to go to the library.
- 124 Be more organized. Offer more interactive help.
- 125 be more precise
- 126 be more reliable, less cluttered
- 127 be more specific offer to be accessible anywhere without have to fumble with school ID to access
- 128 Be more technology savvy, provide summaries on web site.
- 129 be more vocal of what is available to me. be more willing to help me when I need help.
- 130 be open 24 hours, have more aids available
- 131 Be open better hours, have more up to date cataloging
- 132 be open longer on weekends, have stacks explained better
- 133 BE OPEN MORE OFTEN AND HAVE PAPER PRINTOUTS MORE AVAILABLE. WE HAVE TO PAY 10CENT A SHEET EVEN AFTER WE HAVE PAID \$5,000 TO GO TO SCHOOL FOR A SEMESTER.
- 134 Better access to electronic books, More innovative website.
- 135 better access to journals and full-text articles, easier access to links to other sites
- 136 better access to the internet and the online library resources, open later in the evenings especially during thesis due dates and finals week, before and during
- 137 better descriptions of books in the collection, better online resources like articles
- 138 Better organization and more books
- 139 better organization of journal articles--make it easier to find what your looking for.
- 140 better organization of search engines better info on subjects
- 141 better organized sites
- 142 Better search engine for finding articles related to specific subjects on library computers; more library hours of operation
- 143 better search engines faster computers
- 144 Better Subject info, better keyword search to pick up both Title and Subject
- 145 better system for catalogue more knowledgeable librarians
- 146 Better the capacity of the computers in the library
- 147 better website and more sources
- 148 better, step by step instructions for searches w/in catalogue
- 149 Built in search refining for online searches, librarians should be more informed about web resources.
- 150 Buy newer books and set up a website.
- 151 campus library is just fine the way it is
- 152 campus library is only available from the school's intranet. allow searches from the Internet
- 153 campus library?
- 154 can't think of anything
- 155 Can't think of anything
- 156 can't think of anything

157 can't think of anything  
 158 can't think of anything off-hand  
 159 carry up-to-date journals  
 160 Categorize the study subject in more detail. Provide more online database that have the actual, full length article.  
 161 Clarify their web design so that the information is easier to find. I go to [university name], and their web access is pathetically slow and hard to navigate. That and adding more text accessible from home computers (books, journal references, things like that). It's easier to write from home, so I prefer to seek out the information from home. The more content they can provide, the better!  
 162 compile books available and easier to search  
 163 computers  
 164 computers and assistants  
 165 Create a campus library Website. Make available more articles on subject related material.  
 166 Create an accessible library online. Get a wider range of non-art related books.  
 167 critical analysis on Shakespeare critical analysis on anything  
 168 cross-reference books better  
 169 decrease the number of menus and links required to click through to find the content.  
 170 Digitize all periodicals  
 171 Digitize articles Digitize Course Reserves  
 172 Do not use  
 173 Do not use the campus library.  
 174 DON'T KNOW. BASICALLY. IT IS SOMETIMES A BORING PLACE FOR ME TO GO TO, UNLESS PLEASE NOTE THAT I HAPPEN TO BE REALLY INTERESTED IN A CERTAIN SUBJECT AND WOULD GO THERE TO RESEARCH IT FURTHER.  
 175 Don't let the homeless people use the computers. Otherwise, everything is good.  
 176 Easier access to information and ability to search library computers without having to have a librarian or password.  
 177 easier access to journal articles, newspapers, and misc. reference materials  
 178 easier access to more books that we need.  
 179 easier access to off campus students, easier  
 180 easier log in upgrade the server, too slow  
 181 Easier off-campus access to various database services (i.e. store) - they allow access from on-campus IP addresses, but you have to use a proxy or library card # to access most of them from off campus computers. better physical organization of books  
 182 Easier search engine  
 183 Easier search engines. Easier navigation.  
 184 easier to find stuff, make like to site more known  
 185 easier to find the articles and books that contain the info that I'm looking for.  
 186 Easier to use and faster connection time  
 187 easy search engine for all text in library instead of separate ones for articles and books available help from librarian  
 188 Easy Searches on Library databases and a quiet atmosphere  
 189 easy to find and helpful  
 190 Easy-to-find systems and locations  
 191 Especially, at small colleges, the librarians should be aware of many of the classes that the students take. They should make themselves more available in the evenings. Most students don't go to the library until then and by that time much of the help is gone.  
 192 everything is fine  
 193 Exact Searches and a separate media library.  
 194 expand the amount information that can be receive off the internet

195 Expand their options using the internet. Make the internet more accessible.  
 196 explain how to use the complicated journal search and explode and have more people available in  
 the library just for research help  
 197 Explain the system they have the books filed under better. I can't find anything! I was taught dewey  
 decimal, they use library of congress. It's ridiculous.  
 198 extend hours and have magazines/journals/papers listed by topic/subject in the periodicals section  
 199 Extremely useful search engine of books. By subject, by title, keywords, etc.  
 200 faster network help class  
 201 Faster online reference librarians Access to full articles online  
 202 Find accurate information quickly and find bibliographic information quickly  
 203 Find appropriate information Lead me to appropriate sources  
 204 Find articles relating to your studies and tell you exactly where those articles are in the library.  
 205 find books on the subjects you need  
 206 Find books, find articles  
 207 Find information quickly and Have information readily available  
 208 Find journal articles, find books.  
 209 find online journals with full text and locate books within the university's library easier  
 210 Find relevant and accurate, reliable information for my assignment Make this information easily  
 available (be able to get the book, links to journal articles work, etc.)  
 211 Find resources in the library. Find resources outside of the library.  
 212 Finding critical analysis, which is what is most commonly needed, and looking for my search on  
 many websites  
 213 fine as it is  
 214 First of all, make their website easier to use. I've tried [db provider] and other rinky dink systems,  
 but they make no sense and I can't figure them out. when I search online, I'm looking for full text.  
 this includes the library. if I wanted to look at the abstract, I'd drive myself to the library. I access the  
 internet because I'm at home researching.  
 215 first, have a more easy to navigate search engine and second, stock more recent books so we don't  
 always have to use inter-library loan  
 216 First, tell me it exists  
 217 Get a better library-more books.  
 218 Get a better website!  
 219 Get access to more databases. Make it easier to find specific data such as historical sales data for  
 global positioning systems hand held units.  
 220 Get better computers in the library and provide more books in the library  
 221 Get more books - not enough selection Get more copies of books - frequently unavailable  
 222 Get more books and ebooks.  
 223 get more books that I need be more helpful in finding them  
 224 Get more complete journal articles on line. (many are only abstracts)  
 225 Get more computers and make them easy to use.  
 226 get more databases with full text articles get more temporary parking near the library  
 227 get more staff be more user friendly  
 228 Get more updated books. Get more computers to go online and a separate section for those who are  
 only typing up papers.  
 229 Get organized.  
 230 get people in there who know where things are. get nicer people in there.  
 231 Get rid of the fancy Java version of the website with pop-up menus and improve the text-based  
 version of the website. Make sure all links work.  
 232 get smarter people and nicer people

- 233 Give an explanation of what exactly I am searching in. (Books, Database, etc.) Improve catalog practices I am not overlooking anything by searching for information on the web.
- 234 Give me books that are in the area of what I'm looking for and could apply to what I'm studying.
- 235 give me information and be easy to use
- 236 Give us examples of articles to use and where to find them.
- 237 give us more of an option on the sites we can access
- 238 guide me to find the correct links to look up topics, help me help myself
- 239 have a bigger selection of articles have more current books and journals
- 240 HAVE A BROAD AREA FOR SEARCH SO THAT THE RESEARCHER CAN NARROW IT THEMSELVES CLEARER ON WHERE TO FIND THE RESOURCES
- 241 Have a complete list of works and old newspapers, magazines, etc.
- 242 have a computer system that has more keywords, and says exactly where the book is in the library
- 243 have a desk specifically operated for that reason (to help w/ assignments) and offer free coffee and doughnuts, etc. to help us through the long night
- 244 have a FAQ page for help finding things
- 245 have a faster interlibrary loan system (it is now 3 weeks) and a better reserve desk (more copies going out for longer)
- 246 have a general web page that asks you what you are researching, then they should be able to refer you to a more specific search engine/database/index etc. they should also have free online help
- 247 have a good help department and have a system that makes it easy to find materials
- 248 Have a good resource booklet to look at if you need help in finding information and have knowledgeable staff about different programs.
- 249 Have a library map ready so one could easily find the book/journal one need. Provide assistance in finding books not at the library by giving options of where to find what you need at other libraries.
- 250 have a list of the websites that have helped other students with the same subject matter.
- 251 Have a lot of full-text articles. Be easy-to-use.
- 252 Have a more complete site map to show what they offer, and be quicker and less cluttered.
- 253 Have a more easily navigable Web site and allow for access to certain resources from home computers.
- 254 Have a more educated staff more info and availability
- 255 Have a more organized directory.
- 256 have a more up-to-date supply of books have an easier to remember URL
- 257 have a more user friendly environment and computer systems. Also allow for a wide range of questions or requests to be put into the systems. Many times the systems are 'narrow minded' and you cannot think of ways to rephrase your request to get a valid response.
- 258 have a special section with biographies only
- 259 have a tour to guide me to were everything I need to know is and how to use it.
- 260 have a website & be more polite
- 261 Have a wide selection of books, magazines, journal articles, etc. Have a web based database to find what you need
- 262 Have a wider selection.
- 263 Have accessible librarians and a user-friendly website.
- 264 Have adequate information Make it easy to access
- 265 Have all databases available online Mail needed books to my home for free
- 266 have all materials available on an online format in an easy to access form
- 267 Have an easy access to their web site.
- 268 Have an informed librarian and someone like a computer assistant to help you to use computer when there is a problem
- 269 have an online help desk. a search engine for the actual books available the library with a system to place them on hold, for later pick-up

- 270 Have better hours, have people with more knowledge of various subjects
- 271 have better instructions on how to use features
- 272 Have better links.
- 273 Have better referencing with journal articles better search engine
- 274 Have better search engines Have a larger variety of material available
- 275 Have better ways of finding hard- to- find topics and more information such as web sites.
- 276 have book, summaries
- 277 Have books in one location. Update the books.
- 278 Have competent people working there. Have POLITE people working there. Have MORE people working there. Don't spend 10 minutes lecturing me about what happens if I return a book late; I am not 12 years old!!
- 279 Have complete electronic versions of journal articles Have more computers that students can use for homework
- 280 Have computers with Internet access Have numerous copiers
- 281 Have course lists of assignments and what books would help.
- 282 Have current information Have knowledgeable staff
- 283 Have detailed subject lists step by step guides
- 284 have easy access to reference materials and in-person or online help
- 285 Have experienced staff designated for that task who can be free to help students. Have plenty of computers and printers available for students to use resources such as [db provider].
- 286 have fast and accurate searches
- 287 Have full text article databases. Databases with just abstracts or summaries do little good if the journal is not available anywhere or you have to pay allot to get a copy.
- 288 Have full text articles available. Have a free option to get full text articles off of web sites.
- 289 Have full text articles Carry ALL periodicals that are listed in the databases on the website like [db provider]
- 290 Have full text articles, and cheaper ways to copy magazine and newspaper articles
- 291 have full text for more journals get more current books
- 292 Have good links with professor's pages Be able to access the best information from outside search engines.
- 293 have guided info pages next to the computer, and have computer Tec's on hand
- 294 Have help come to you sometimes. Allot of people are shy at my school. Be able to access certain sites off the libraries computers... such as [db provider].
- 295 Have help on hand to find articles or suggest locations where articles may be found. Provide help validating sources as viable for certain kinds of papers.
- 296 have information and be open
- 297 have internet knowledge, and be more helpful of their site
- 298 have librarians readily available have well designed sites
- 299 have librarians who know how to access the correct information
- 300 Have many copies of a particular book or journal and make them easy to find
- 301 have more available librarians have booklets with helpful hints on research available
- 302 have more available online
- 303 have more books and a larger amount of different types of periodicals.
- 304 Have more books currently in library
- 305 have more books on-hand get rid of microfiche
- 306 Have more complete articles and a more broad selection of information.
- 307 have more complete articles on file and have more access to different websites that DO require a fee so that students don't have to pay them themselves.
- 308 have more computers have a faster connection

309 have more computers , faster connection  
 310 have more computers and have more information available to the student  
 311 have more computers available.  
 312 Have more computers to use in the library Have a website that is easier to navigate  
 313 have more computers with full internet access and more working copy machines with an allowance of free copies  
 314 Have more computers; more resources available.  
 315 have more convenient parking and a less dangerous campus  
 316 have more cordial reference librarians who actually know how to reference articles, not just warm a seat  
 317 have more electronic books available for MACINTOSH! Heavy PC bias, currently.  
 318 Have more electronic journals  
 319 have more engineering references have more pop lit for study breaks  
 320 have more full text articles on-line, have more full books on-line  
 321 have more full text databases  
 322 Have more full text electronic articles. Have a better search tool.  
 323 have more full-text articles online. be open for longer hours.  
 324 Have more helpers walking around Offer more classes on library use  
 325 Have more info available and make the website user friendly  
 326 have more information available on their resources  
 327 Have more information on Math related projects, etc.  
 328 have more information, and be open later  
 329 have more journals online easier access/better instructions online for how to use it  
 330 Have more librarians available and maybe have a manual to help students make their way around the different sources on the web.  
 331 HAVE MORE LINKS FOR WEB SIGHTS THAT MIGHT HAVE THE INFO THAT I NEED. Have MORE BEEKS [sic] ONLINE.  
 332 Have more links to useful websites listed by category  
 333 have more material to work with  
 334 Have more online periodical/journal articles, Clearer arrangement of information  
 335 have more online resources, where could request a journal , if the library doesn't have it, to be able to [be] picked up later  
 336 Have more people on staff to help out with research and be available to students 24 hours a day.  
 337 have more readily available online journals and keep database up-to-date  
 338 have more resources, provide options to get resources elsewhere  
 339 Have more search engines and have more information about a wider variety of subjects.  
 340 have more variety of magazines and journals at the library  
 341 have online tutors to teach how to find information.  
 342 have professors notes available on-line review sheets  
 343 have some research experience on the web be willing to promote sources that are not available on campus  
 344 Have someone else do it for me Have nicer librarians  
 345 Have someone there to help me find needed materials. Have needed materials  
 346 have specific people to help  
 347 have summaries of all of their books online so that I could see if it sounds like what I need  
 348 Have the actual books in e-book format, and as long as you are a student (with your ID etc) you can access this info for free  
 349 have the book or info I need. be able to answer any questions I have.  
 350 have the book/information and be able to give locations that do have it if they do not.  
 351 Have the books that they say are available actually be available.

352 have the librarians more accessible. have the librarians less put-out for being accessed  
 353 Have the Library assistants know more about their web site and make it easier to use  
 354 have the necessary books and equipment there to help you  
 355 Have things categorized well and provide a competent search engine.  
 356 have tutors there and more staff  
 357 Have updated material, online and hard-copies and have MORE materiel on every possible subject  
 358 Having more full texts available online. But they do a pretty good job now with online catalog and  
 online interlibrary loan requests. [university website address]  
 359 help explore ways to look up certain topics  
 360 Help find books. don't charge to make copies.  
 361 help find information and help cite sources  
 362 Help finding books that aren't on the shelves. Help getting books that our library doesn't carry.  
 363 help me!  
 364 help to gather pertinent information on topic help find reliable sources  
 365 Hire better student aid at the circulation desk and improve organization and location of items.  
 366 Honestly, I am really satisfied with the campus library. The one thing the can do is post a little more  
 information on topics.  
 367 I am not sure if they need to do anything more than they already do.  
 368 I attend a small business college, and we do not have a library.  
 369 I believe that the campus I'm at, does not have an on-line library website. However I have used them  
 at other colleges I've been to and I found it hard and confusing to locate information because you  
 had to have all of these codes.  
 370 I can handle it myself. I don't need the campus library's help.  
 371 I can't really think of anything, our library's website is pretty good  
 372 I DIDN'T know my campus had an online library  
 373 I don't know - everything's been going well on its own.  
 374 I don't know I don't use it.  
 375 I don't know what I'm suppose to get from my campus library website.  
 376 I don't really expect much of them, being a comp science major I do most of my research on my own.  
  
 377 I don't really need my campus library for assignments. Everything I do is technology related and not  
 based in printed materials.  
 378 I don't really spend enough time there to care. I do my own work.  
 379 I don't really use the campus library. I do all my research from home because it is more accessible  
 380 I don't use my university's library site because I live about twenty yards from the library. I'm not that  
 lazy. If I need something bad enough I go there.  
 381 I don't want help  
 382 I get lost in there and have no idea where anything is so a good map or directory would definitely  
 help. And if there were more librarians that would help because there isn't even anyone around to  
 ask when I get lost.  
 383 I hate libraries! more book and more computer  
 384 I have always been able to get the information I've needed from the campus library's website.  
 385 I have never used the library's website. But if it was easy to find information and easy to locate this  
 information, it would help  
 386 I have no need of the campus library website.  
 387 I have no previous experience with the campus library website  
 388 I haven't used my campus library  
 389 I like my campus library  
 390 I like my campus library, it gives me all the information I require  
 391 I live off campus and find no need for the library.

392 I need to be able to easily find information on topics I am researching. I should also be able to find  
 enough correct information to help me with my assignments.  
 393 I prefer to do it on my own  
 394 I prefer to use my town library and my own computer  
 395 I prefer to work on my assignments at home. The campus library has too many people, if I need to  
 get up to use the bathroom, I lose my computer. Also, I have to pay to print out materials.  
 396 I seem to be doing just fine already. I can't think of anything.  
 397 I think that my campus library does provide great resources for study assignments.  
 398 I think they should have more librarians to help. Sometimes they are very busy and can't help you  
 for days. Also, I think they could use more international books. More information on countries in  
 Asia. Japanese is one of my majors and sometimes it is very hard to find information on Japan. Up to  
 date information that is.  
 399 I would like an explanation about what the various resources can be used for.  
 400 if the web says that they have the book, they probably should have it or update the web site to the  
 fact they do not.  
 401 if they don't have what you need, they should tell you where to find it should be organized  
 402 I'm in a bit of a specialized field and I wouldn't expect the library to go out of their way to cater to  
 me and my classmates  
 403 I'm not sure they can really help that much, but advertising their services would probably help a lot.  
 404 I'm not sure, I pretty much try to figure things out for myself.  
 405 include outside links suggest related materials  
 406 Increase amount of periodical articles online, Increase online response to questions  
 407 Increase number of online full text journals. Have an online librarian help chat.  
 408 increase web access and put more reserve texts online  
 409 Inform students on how to access the website List/post helpful hints when searching for topics  
 410 information is hard to find sort throughout thousand of articles manually it takes hours and hours  
 on end  
 411 Interactive map to show placement of books and more resources available online  
 412 It already does provide document delivery and ILL services.  
 413 It is adequate already  
 414 it is dependent on the assignment  
 415 It is not up to the campus library to help me with my study assignments.  
 416 It would be beneficial to me for the library to have a more extensive selection of books pertaining to  
 art as well as articles on the search engines. When studying art history, quality articles are few and  
 far between.  
 417 it's fine  
 418 I've already discovered the keys to online research, but other students should be made aware of the  
 great resources (electronic journal articles)available.  
 419 I've gotten pretty much all I needed each time I used my campus library.  
 420 journal articles, not just the abstracts  
 421 Just be open and have a knowledgeable staff. The rest is up to me, and I prefer it that way.  
 422 keep plenty of full text articles linked through the website  
 423 keep putting more journals on the web  
 424 Keep staff in library at all times to help. Allow us to take reference materials out of library or make  
 copies of pages.  
 425 Keep the Help Desk open later and put more information on the books in the Online Card Catalog.  
 426 keep the local holdings information up to date, as to whether books/journals etc are in a library,  
 shelved, being bound... E [sic]  
 427 keep their websites current keep an accurate tally of the journals that the library contains  
 428 keep us informed on how to use the web site

429 less steps to find the book you want. More guidance on how to find books.  
 430 Librarians need to be more available to help when you have questions. They are always too busy to  
 help you when you need help. You have to be an expert to be able to navigate through their system.  
 Second they need to have better directional signs and maps so that you can find all the areas of these  
 3-4 story Libraries. I always get lost in there and the librarians are too busy to help you find where  
 you need to go.  
 431 Librarians need to learn how to use the resources available. They also need NOT to underestimate  
 the students' abilities and knowledge base in using the computer.  
 432 Librarians should be willing to answer more questions to help students.  
 433 library? what's that? ;-)  
 434 Links and Authors  
 435 links to all the databases they subscribe to, these are important because the information is legitimate  
 and always accepted by professors.  
 436 Links to helpful websites and more full text articles  
 437 links to online information outside the scope of university intellectual property.  
 438 links to search engines, search engine for finding books  
 439 list more complete text articles, Make [periodical], and [periodical] (current news items) more  
 available  
 440 List of books that may be useful in a specific course for quick searches. Search for resources by topic.  
  
 441 list sources of information better, and organize search results  
 442 List the websites and how to search for information  
 443 Lists of websites that are useful. Put full texts of books on website. (Maybe that's what they do, but I  
 don't know.)  
 444 locate books, articles and anything else of paper that would be of help on the topic that I am  
 studying or researching.  
 445 locate journals locate sites of reference  
 446 locate resources and correctly cite them.  
 447 location of book or resource within the library itself.  
 448 longer hours to accommodate students with jobs.....and have more copies of certain books so more  
 than one student can check it out  
 449 Make [db provider] easier to access put more electronic reserves in the system  
 450 make [db provider] information easy to get to via the web make more journal article complete  
 instead of abstracts  
 451 Make a more user-friendly guide to all the information available via the website  
 452 Make a multi-library search available, make journals available online (ex. [database]) -- the library  
 would have to register and pay an annual fee for this availability, but it would be of great  
 convenience to the students.  
 453 Make a website. Turn on the heat on cold days.  
 454 Make access to databases more visible on the web  
 455 Make all articles available through some sort of electronic data base, for instance [db provider]. I  
 always use [db provider] and always choose only to get the full text articles for if they are not on that  
 site I will not use them I am not going to look around the library for them.  
 456 make all materials, including books, journals, magazines etc. available online  
 457 make articles easier to find  
 458 Make articles easier to find  
 459 make electronic journals more easily accessible from online  
 460 Make everything avail for checkout, even if it is just for 1 night.  
 461 make everything available in text give bibliographies  
 462 Make finding information easier  
 463 make full articles available online

464 make full text articles available on the computer offer more help  
 465 Make full text articles easier to locate, and make it easier to figure out if our library subscribes to specific journals or not.  
 466 make information easier to find and [sic]  
 467 make information easier to find, easier to access  
 468 Make information more readily available; increase the number of copies of each book  
 469 Make interface easier to use Update database  
 470 make it clearer  
 471 Make it easier and more available to use. Make it accessible off campus  
 472 Make it easier to access books, and be able to view whole books online  
 473 make it easier to find stuff  
 474 Make it easier to find the book I need in the library, when I get the information about the book. Also, they should keep magazines in a more organized manner than they currently do.  
 475 Make it easier to find the correct information--searching for information is difficult because it pops up all this useful info that has nothing to do with the topic Make it easier and faster to find what you are actually trying to look for  
 476 make it easier to find the info we are looking for  
 477 make it easier to find things and have more information  
 478 Make it easier to get full text articles and make it easier to do a combined search.  
 479 make it easier to locate which library a text is in.  
 480 Make it easier to navigate, and put full text article on the net  
 481 Make it easier to order books online from home from other libraries for pick-up at my library. Have an easier to use search engine for full-text articles.  
 482 make it easier to set up searches from off campus  
 483 make it easier to use and cheaper to print out pages  
 484 Make it easier to use resources such as [database] (which I use most frequently) off-line the campus network, i.e. from home. Make printing in the library easier and all articles available on-line in full-text, eliminating Interlibrary Loan.  
 485 make it easier to use the database/electronic journals index create an easier keyword search  
 486 Make it easy to find and get the information you need and provide a good environment for working  
 487 make it easy to find information that is accurate recommend web sites that are known to be accurate  
  
 488 Make it easy to use and offer a wide selection of materials.  
 489 make it faster make it more accessible  
 490 Make it faster. Provide more computers  
 491 make it more convenient, and less of a treasure hunt  
 492 make it more known, and easier  
 493 Make it more user-friendly and make it easier to go back to previous pages  
 494 Make it open 24 Hours and have tutors on call 24 hours  
 495 make keywords easier to guess, so when searching for a topic you don't have to have as specific of keywords as they do. help find things on the web.  
 496 make more articles available  
 497 Make more complete resources available and make them easier to search through.  
 498 make more journal articles available on line  
 499 make more journals available online subscribe to more journals  
 500 make more things available on line be able to see more journals on line  
 501 Make off-campus access easier. Connect 'WebCT' with library more closely.  
 502 Make resources easier to find and know about  
 503 Make searching easier, and have more technical information.  
 504 make simpler to use and allow more full text articles.

- 505 make some text available online, cross-index other library catalogs
- 506 Make special collections more easily available. Find a way to allow a search of the text for keywords of 'in-library' journals
- 507 make sure database is updated Have recordings in stock
- 508 make sure the website is up to date put more articles on the web (full text articles)
- 509 Make system more user friendly Enable students to log on with student ID and password instead of calling library to obtain the password of the semester
- 510 Make texts of more periodicals available on-line. Make texts of historical documents available on-line.
- 511 Make the campus book exchange much easier and faster
- 512 make the campus library site more accessible because I didn't even know we had one
- 513 make the catalog more comprehensive and the computer system could be more reliable
- 514 Make the information easier to find
- 515 Make the information easier to find, and have updated versions of the most used books.
- 516 make the information easy to find, Have speedy responses when sending email when you can't find what you are looking for
- 517 Make the interface for the library website a little bit simpler. Also, have the ability to see what other books people have checked out when they checked out the book you are looking for.
- 518 Make the library easier to navigate or provide more assistance in finding the correct information. Have seminars in how to more efficiently and effectively utilize their services and tell exactly what services they can provide.
- 519 Make the passwords to the sites available to students. Have a better description of what the learning resources is.
- 520 Make the research process easier. Place an on-line librarian choice on the menu so you can ask questions.
- 521 make the search engines easier to browse through and use
- 522 Make the search options more self explanatory, rather than needing to be taught by someone visiting a class. Other than that, nothing
- 523 make the site easier to navigate put a search function on it
- 524 Make the site more user friendly and allow me to more easily access my library account.
- 525 Make the web page more user friendly
- 526 make the web site more attractive/user friendly lists of suggested links for starting out a web research project
- 527 Make the Web site more self-explanatory Offer more links to outside resources
- 528 Make the website easier to access. Make the website less cluttered.
- 529 make the website easier to navigate and have it read more general terms under find: subject heading.
  
- 530 make the website easier to use, have online help
- 531 Make the website easier to use.
- 532 Make the website easy to access at home Update the website as often as possible
- 533 Make the website faster. Be able to find more information once requested.
- 534 make their journal search engine a little easier to use
- 535 Make their search engines work more efficiently
- 536 make their services more visible let people know what services they provide
- 537 make their website easy to follow and use
- 538 make things easily understood. with directions on how to use certain resources... sometime those resources that are available can be very confusing. The whole point to a library is to have information that can be accessed EASILY and used for ones on uses. When that information is there, however, it is too difficult to get it ... what good does it do the individual, or the [sic]
- 539 make things available on e-reserve

540 Make things easier to find in the library and make a list of types of things you might find in the campus library since most public library's don't have the same type of resources.  
 541 Make things easier to navigate and add additional resources.  
 542 make things less complicated and have a more helpful staff.  
 543 Make web page easier to navigate. offer tips on web site.  
 544 Make website available; tour of library facility for new students  
 545 Maybe pick out the most popular hits, and make it not take so long to [db provider] and other research areas  
 546 more access to online journals and longer reference librarian hours  
 547 More accessible  
 548 More articles/periodicals available online or a better search engine for the library's collection of print material.  
 549 more books, every book I need is lost or checked out! easier to find websites on the exact topic area  
  
 550 MORE COMPUTERS  
 551 more computers and an easier website to navigate  
 552 more condensed items and organization with all of the resources  
 553 more databases  
 554 more databases, more journals  
 555 More description about the individual articles or books. Easier to link to similar material.  
 556 More detailed information More ways to access the information  
 557 More direct searching options. Less cluttered.  
 558 more diverse selection of journals, and complete collections of the journals already offered. (for example-- my college subscribes to [database] but is missing all the issues from 1956- 1962.)  
 559 more ease, and more information related  
 560 more electronic journals have all books accessible--not at several locations with shorter hours  
 561 More electronic texts online, and make them easier to find  
 562 More full articles with graphs and photographs. More access to subscription sites  
 563 more full-text journal articles an allotment of free photocopies per semester  
 564 More information available online  
 565 more informed, qualified, and HELPFUL workers at the library information desks and better ways of letting me know when a book is due  
 566 more librarians and longer hours  
 567 more links to other net sources more variety in their books  
 568 more links to outside sources access to more information pay sites  
 569 more links, online assistance  
 570 More online articles, and books online.  
 571 more online collections and more search engines for full articles  
 572 more online material  
 573 More online resources Better topic search  
 574 more personal action in the library instead of leading me to a computer better organization  
 575 More professors should reserve material on the subject being covered.  
 576 more relevant information, more information on how to use the system  
 577 More support, more choices in online journal articles  
 578 more theses and journal articles. more books.  
 579 Most importantly, make sure the system is on-line. We often go down for maintenance or security concerns. Second, the library is a bit nutty about security and I often have to type in various passwords several times. Security doesn't need to be THIS tight. There's got to be a better way.  
 580 My campus library already helps me enough as it is, it really doesn't need to be improved.  
 581 my campus library is great

582 My campus library is large and disorganized. There are never enough people to help me find anything. I would like to have had a tour when I entered the campus and have more staff available to help me.

583 My campus library should maintain that group study rooms are the only places where students can talk in the library.

584 My library is fairly adequate but full on line articles would be nice instead of going to campus to try to find them in the stacks.

585 nada

586 no suggestions

587 none

588 none

589 none

590 none

591 none

592 None.

593 Not be closed. (It has been under construction for two years) Have an online database of it's printed works.

594 Not make it so confusing. Use simple meanings and directions with explanations.

595 NOT MUCH

596 Not much - I don't bother with it either way.

597 not much they're already helpful, just not helpful in the way I want

598 not necessary

599 Not sure. I'm used to using outside sources. The information my website provides is bias towards the material. I like material of varied opinion, view and information.

600 nothing

601 nothing

602 Nothing

603 nothing

604 nothing

605 nothing

606 nothing

607 nothing

608 nothing

609 nothing

610 nothing

611 nothing

612 nothing - for the campus library to do anything to help with my assignment would be redundant and replicate the work of existing sites such as google and various periodical web sites I visit. The campus library could not compete with these sites and would offer inferior results; so I would avoid it.

613 Nothing comes to mind

614 nothing I can think of

615 Nothing I do not like going to the campus library.

616 Nothing I'm very independent

617 nothing needs to be changed

618 Nothing really

619 Nothing really b/c I'm in grad. school so most of the things I do are beyond the library website.

620 Nothing really. They do an excellent job already.

621 Nothing, I do them by myself without help.

622 Nothing, I don't need their help. I am fine finding information on my own.

623 nothing, it is very helpful  
624 Nothing, it works just great!  
625 Nothing, my campus library is suitable for just about any research I need to do.  
626 Nothing, our campus does an excellent job of providing librarians to help us out with research questions and has a good and easy-to-navigate website.  
627 Nothing, they provide the resources and should not be expected to do the research for me.  
628 nothing. my experiences have been ok thus far  
629 Offer access to electronic databases and research assistance  
630 Offer an online tutor Offer links to help student  
631 OFFER ASSISTANCE THAT KNOW THE COMPUTER SYSTEM. HAVE A WEBSITE.  
632 Offer better hours and better selection  
633 offer classes for those who don't know how to use the web, so they can be shown how to use the search engines, and have a computer lab in the main campus library.  
634 Offer courses on how to better use the resources found there. Many students don't know that we even have so many options, let alone how to use them.  
635 Offer easy searching of articles and journals that the library has through the website. Offer virtual maps of where the article is located within the library.  
636 offer more assistance locating books, help with locating relevant full length articles online  
637 offer more computers, and offer more suitable hours to college students  
638 offer more databases offer more access from remote locations  
639 Offer more full text journal articles via databases and post reference information for citing such as [database] format.  
640 Offer more full-text databases and have more interlibrary order options  
641 offer more ideas to get information other than the Internet. Call another library to see what they have available on my assignment  
642 offer old test files from professor's online and up to date articles free of charge  
643 offer online assistance  
644 offer quick easy location of sources  
645 offer search engines for specific topics (narrow down searches more, e.g.. school of journalism search engine that finds newscasts pertaining to class activities)  
646 Offer some articles online for those who don't have time to find them at the library, and give examples for reference.  
647 Often times, books are not placed on the right shelves or areas of the library. The library catalog says the book is available, but it isn't where it's suppose to be. It would really help if one could find the book(s) he or she needs where he or she is told to look for it.  
648 on site experts  
649 online support through chatrooms, simplify website  
650 organization, help available  
651 organize information better and enable access from our home computers  
652 Organize the info page more intuitively Make the online card catalog user friendly  
653 Organize the information on the site. open longer on the weekends  
654 Organize the Webb pages so it is easier to understand and find information.  
655 orientation, faster connection  
656 Our campus library should have books that are dated closer to 2001 than 1922 and they should have more computers.  
657 Our library already does these two things, but I find them extremely helpful. One thing is that they order articles that aren't available in our library, and then they pay the charges to save students and faculty the expense. Also, they have many article search databases (e.g., [database, db provider, db provider]), and several of them are available from any computer with Internet access.  
658 pass out snacks and juice

659 Point out things I might not see at first, alternate ways to obtain the information I want.  
 660 point us in the right direction  
 661 Post more full text instances of books, journals, etc...  
 662 Promote itself: make it known that it's available. and 2) make it easier to use: a unified portal would be cool  
 663 Promote themselves more.  
 664 provide [db provider] offer back-rubs to its patrons  
 665 provide a easy way to find exactly what I'm looking for.  
 666 Provide a larger variety of topic-related sites/directories.  
 667 provide a lot more electronic books.  
 668 provide a more efficient search engine provide better support services  
 669 provide access to [database], and help with using [database]  
 670 Provide access to [db provider] and [db provider] to off-campus students.  
 671 Provide access to more search databases on journal articles. Provide access to more full text articles from journals that are not carried in our library (along with pictures).  
 672 Provide access to the information desired. Provide support for those having difficulty finding such information.  
 673 Provide accurate and current information  
 674 Provide accurate information Provide a multitude of informational sources  
 675 Provide additional online resources available anywhere to students with passwords.  
 676 provide an online journal search  
 677 provide better access to the info, and make it free to access  
 678 provide computers, have helpful environment and staff  
 679 provide databases for us to use and an online catalog to locate books.  
 680 Provide easy access to librarians and keep the Website up and running.  
 681 Provide easy links to sites that provide free access to full text journal articles. Provide more links and keep them updated.  
 682 Provide efficient, accurate, working search engines and databases. Provide the information needed to complete the assignment.  
 683 provide electronic versions of magazines, encyclopedia, etc. keep up the good work, nothing else wrong.  
 684 Provide Ethernet ports at every table and revamp the library Webb pages  
 685 provide faster access have ask a question people respond faster  
 686 Provide frequently asked questions about the library and its Webb pages. Give a list of useful websites for research.  
 687 provide help for library of congress subject headings, be more user-friendly  
 688 provide info, be available for help  
 689 provide links to outside newspaper/magazine articles. provide full text online of their resources  
 690 Provide locations for group or individual study (either in or near the library) Encourage free browsing of the stacks  
 691 provide more links to other places and list links w/ bibliographies  
 692 provide more online article from research journals Have all of the books in the online catalog  
 693 provide more online full-text journal access  
 694 provide more paper, easier connections in rooms  
 695 Provide more people to help at busy times. Provide people who are well trained to help.  
 696 Provide more reference librarians at night, have later hours during busy times (exams, etc)  
 697 Provide more specific information in regards to information you need to look up. Design a website relevant to information instructors may assign for a particular class.  
 698 provide more tables and more resources  
 699 provide outlines of the text

700 Provide screened lists of sites that are known for good analytic content. Provide electronic copies of the texts in the library.

701 provide search of books outside the library

702 Provide tech support for online searches, and readily provide usernames/passwords for conducting searches on the library's database from off campus

703 Provide up to date list of campus resources, Include text for course reserve materials online.

704 provide website summaries. have search engines for websites.

705 Publicize more. Otherwise, it is great.

706 purchase and set-up more internet ready computers Assign a graduate student/computer network specialist to these computers to provide advice and keep the system running

707 Put more complete articles/journals online

708 put most researched topics on a home page

709 Putting more full-text journal articles would be great.

710 Quicker access to information not carried by our library and a more versatile search system. The online catalog at my university is VERY poor - you can never find what you're looking for.

711 Really, I've always found the library to be most helpful in my assignments, whenever I fully take advantage of the resources available to me

712 Rearrange the library because it is too confusing the way it is set up now. Give a lesson or offer a help session on how to use their website.

713 Reference materials, easy of the online journals

714 Repair the links and add more.

715 repair Xerox machines consistent hours

716 Re-shelve books

717 review and give feedback

718 rework the current website and advertise it more

719 Search engine

720 Searches could be easier to use Live online help would be useful

721 set up email address for answers to informal questions offer more journal articles online

722 set up websites for an individual subject

723 show professors specific assignment information Have a search of relevant information

724 Show websites that are most visited by students for similar subjects.

725 site should be better organized. site is very slow if accessed remotely.

726 Smaller library sections and friendlier help.

727 Sometimes the books are hard to find with the call number and sometimes the site is down so I can't always access it from home.

728 specify which full text journals you can access

729 Spread the word about it and what it can do for students.

730 Staff More Knowledgeable Website more explanatory and maneuverable

731 stay open longer and be located closer to my home

732 stay open longer hours and more up to date reference books.

733 Stock more resources.

734 study guides and search links

735 Subscribe to more online journals Make it easier to access online journals off-campus

736 Subscribe to more online scientific journals Keep website organized like it is now

737 suggest where I might get a book if it is not available there and provide a larger variety of books

738 supply more study rooms for groups lower the price of copy machines

739 take questions online, have training sessions

740 Technical aid with computers for those who need it and recommendations for books or articles that may be helpful.

741 Tell me what the site is? :P

742 the actual library is very cluttered with information that is not tailored to my major, there website  
 has never helped me because they never have what I need  
 743 The campus library website is usually very, very slow. It makes it inconvenient to use.  
 744 -the employees in the computer labs should be more knowledgeable -  
 745 The information I need is so much more easily accessed via the Web that I just do not use the campus  
 library. Unless they provide access to as much information and I can access it at home, they can't do  
 anything to help me.  
 746 the librarians need to be more willing to help the students, and the library needs to be open later  
 hours.  
 747 The library is adequate.  
 748 The Library is fine.  
 749 The Library should 1. have more of an idea of what is going on in specific courses 2 Have a readable  
 database  
 750 The library should be open earlier in the morning, and open on time. The copier machines should  
 cost less money.  
 751 The library should have staff that are extremely familiar with the internet and have broader access to  
 specific websites that house articles and journals.  
 752 The most important thing the campus library can do to help is to provide clear information on how  
 to find the subject you are searching for. Another thing would be to have the ability to connect and  
 talk with a librarian who can help you if you get confused.  
 753 The online catalog is very helpful. I can also order books from other institutions right online.  
 754 The only thing that springs to mind is to provide off-campus access to academic search engines  
 without having to request a password.  
 755 the site is down allot  
 756 There is nothing they can do to be better, other sources are just easier to use. I use my library when I  
 need to get a specific thing there for a class. Otherwise I can get the information easier from other  
 places  
 757 There's nothing it can do. I use [db providers] which are offered in the computer lab in the law  
 library. However, I can access [db providers] from my home computer  
 758 They are doing an alright job already. They do about as much as they are capable of doing on this  
 particular campus.  
 759 they are great more class websites with helpful information for particular classes would be excellent!  
  
 760 They do a fine job already  
 761 They need to have updated information on the site and to make it more usable.  
 762 They should have sessions on how to use library resources and they should hire personnel to help  
 students who have problems finding materials.  
 763 They should have the books required in my courses. They also should have 'Dummy's' & 'Idiots'  
 books for a variety of courses.  
 764 They should offer a section for each major, with the required reading. Have a cross reference type  
 search engine.  
 765 They should offer an easier way to find books and provide better assistance.  
 766 They should update info more often- buy newest books immediately, and keep the shelves  
 organized.  
 767 They should update their databases more often so that you can find books more easily. They should  
 contain summaries.  
 768 they're doing a good job  
 769 they're perfect  
 770 to be honest, I have pretty independent study and resource-finding habits

- 771 too much of a hassle to go to the site, then search around and only get info from really one source, that library. It is simply easier to get things off the web. Even if my professors guarantee it is on that site, it is my last resort
- 772 Train students in how to find things
- 773 Train their staff better and reorganize their periodicals to make things easier to find.
- 774 trying to get all resources catalogued online keeping electronic resources available to the students at no cost
- 775 Unlike [university name], have the following: (A)a search engine that takes less than 2 years to learn to navigate; (B)Librarians who care.
- 776 up to date information easy to understand instructions
- 777 update catalog more frequently group books more logically
- 778 update the computers and add more computers
- 779 update the home page more frequently
- 780 Update the resources and increase the supply of resources.
- 781 Update the search engine so that searches can be more productive. Have a guide to help people to be able to use any tools that might be available on the site.
- 782 Use Google
- 783 website could load more quickly
