42. Further Description of Important Interior and Exterior Features (Continued on Reverse if Necessary) <b>This academic hall exemplifies the Georgian Revival style of the 1930s, with its symmetrical brick facade, central Palladian entry treatment and rooftop cupola. The main entrance is set off by a gable at the roofline and a two-story stone enframement with Doric columns and classical entablature at the first floor and Palladian window and Ionic columns at the second floor. In front of the window is a narrow balcony with metal balustrade. The entrance, double doors with a diamond-pattern transom, is reached by a short flight of steps. A west side entrance is similarly treated, with stone pilasters and entablature topped by a tall second story window with balcony. Windows have 8-over-8 sash and are square-headed, but set within blind arches at the first floor of the center section. Other features of the Georgian Revival style include the use of a wide frieze at the cornice, Flemish bond brick pattern, and brick quoins at corners. The cupola is constructed of frame and rests on a raised platform with a decorative urn at each corner.</b>		32. Roof Type <b>Hip</b> Roof Material <b>Asphalt shingle</b>		
43. History and Significance (Continue on Reverse if necessary) <b>Kreger Hall was the only academic building constructed with state appropriations on the Miami University campus in the 1930s. The central portion of the building, containing 23,000 square feet, was completed in September 1931 for use as a chemistry building. The east wing (12,570 square feet) was finished in 1937 and the west wing (14,650 square feet) in 1939. The building was originally named Hughes Hall after Raymond M. Hughes, professor of chemistry 1898-1911 and university president 1911-1927. In 1968 the building was renamed in honor of Clarence W. Kreger, a professor of chemistry who developed many of the technical programs that led to the creation of the School of Applied Science.
